Olexandr Isayev, Ph.D.

Division of Chemical Biology and Medicinal Chemistry,
UNC Eshelman School of Pharmacy,
University of North Carolina at Chapel Hill,
301 Beard Hall, Chapel Hill, NC 27599

email: olexandr@olexandrisayev.com phone: 919 966-3459
web: www.olexandrisayev.com fax: 919 966-0204

Education

2009–2012	Postdoctoral Fellow	Case Western Reserve University, Cleveland, OH
2008	Ph.D. in Theoretical Chemistry	Jackson State University, Jackson MS
2002	M.S. in Chemistry (*summa cum laude*)	Dnepropetrovsk National University, Ukraine

Professional Experience

2017–	Research Assistant Professor, *UNC Eshelman School of Pharmacy, University of North Carolina at Chapel Hill*
2016	Sr. Fellow, *Institute for Pure & Applied Mathematics, University of California, Los Angeles*
2013–2016	Research Scientist, *UNC Eshelman School of Pharmacy, University of North Carolina at Chapel Hill*
2012–2013	Sr. Scientist, *US Army Engineering Research & Development Center (Duty station: Vicksburg, MS)*

Selected Honors & Awards

2017, 2014	ACS Emerging Technology Award
2016	Eshelman Institute for Innovation Award
2015	Chemical Structure Association Trust Award
2014	NVIDIA GPU Computing award
2009	IBM–Löwdin memorial Fellowship

Patent Applications

O. Isayev, M. Popova, A. Tropsha. "Methods, systems and non-transitory computer readable media for automated design of molecules with desired properties using Artificial Intelligence". US Patent Application 62/535,069 (Filed in 2017)

Selected Seminar and Invited Presentations

1. Neural Networks Learning Quantum Chemistry: The Rise of the Machines. *254th ACS National Meeting,* Washington, DC, August, 2017.
2. Seminar: Accelerating computational chemistry with machine learning, *Hebrew University Jerusalem, Israel.* June 2017
3. Seminar: Accelerating computational chemistry with machine learning, *GSK.* May 2017
4. Cheminformatics-Inspired Materials Discovery Platform, *2017 MRS Spring Meeting.* April 2017.
5. Seminar: Predicting the electronic structure and properties of inorganic materials with machine learning. *Los Alamos National Lab,* Los Alamos NM. February 2017.
6. Seminar: KinomeNet: accurate prediction of protein kinase inhibitors with deep convolutional neural networks, *Joint Carnegie Mellon - University of Pittsburgh Computational Biology Program.* October 2016
7. Accelerating discovery of selective protein kinase inhibitors with deep learning. *252th ACS National Meeting*, Philadelphia, PA. August, 2016.
8. Predicting the electronic structure and properties of inorganic materials with machine learning. *252th ACS National Meeting*, Philadelphia, PA. August, 2016
9. Computational drug discovery with deep learning approaches. *Deep Learning in Healthcare Summit*, London UK, April 2016
10. Computational drug discovery with deep learning. *GPU Technology Conference 2016,* San Jose CA. April 2016.
11. Materials Informatics Platform: Accelerating Discovery of New Materials with Cheminformatics Approaches. *AIChE Annual Meeting 2015*, Salt Lake City, UT. November 2015.
12. Seminar: Data-Driven Chemistry: Accelerating Discovery of New Materials with Cheminformatics Approaches. *Department of Chemistry, University of North Carolina, Chapel Hill.* September 2015.
13. Computational drug discovery with deep learning. *250th ACS National Meeting*, Boston, MA. August, 2015.
14. GPU-accelerated Virtual Screening: Rationale, Challenges, and Case Studies. *250th ACS National Meeting*, Boston, MA. August 2015.
15. A genomic approach to charting properties of all inorganic crystals. *ICCB 2015 conference*, Lihue, HI. July 2015.
16. GPU-accelerated Virtual Screening for Drug Discovery, *GPU Technology Conference*, San Jose, CA. April 2015
17. Seminar: Data-driven chemistry: From small molecules to discovery of new functional materials. *Department of Chemistry, University of Florida.* May 2015
18. Materials Cartography: a novel way to navigate through chemical space. *Materials Design Workshop*, Moscow, Russia. December 2014.

Professional Activities

Member of the Organizing Committee of Conference on Current Trends in Computational Chemistry (2007 – present) and Southern School on Computational Chemistry (2004 –2012).
Co-organized and led workshop "Molecular modeling of biomolecules" [NSF Center for Workshops in the Chemical Sciences series], Jackson State University, 2007.

Reviewer Grants: NSF (2015–), DoD SERDP (2016–), Natural Sciences and Engineering Research Council of Canada (2016–)

Reviewer Publications: Scientific Reports, Chemical Communications, Journal of Chemical Information and Modeling, Environmental Science & Technology, RSC Advances, Journal of Physical Chemistry, Physical Chemistry Chemical Physics, Journal of Chemical Physics, International Journal of Quantum Chemistry, Journal of Molecular Modeling, Journal of Chemical Education and others.

Research Funding

LANL-CINT Center for Integrated Nanotechnologies (PI) *Development state of the art computational methods with neural networks*
Eshelman Institute for Innovation (PI) *Accurate property prediction for drug polymorphs.*
Department of Defense (Co-I; PI: Heneghan) *Medical Learning Through Machine Learning (ML2).*
Office of Naval Research (Co-I; PI: Tropsha) *Materials Informatics Platform for Property Prediction.*
